

The Year Ahead UPDATE

FFACT – 2020/21

How we as lecturers teach and how you as students learn will be different next year. What you learn will, however, be just the same and we want the experience to remain as 'normal' as possible. Remote teaching and learning, where it happens in unusual ways, is part of our future, in the short term. We are committed to keeping as much of it on campus as we can. We also want to ensure that what you do on campus is as safe and productive as possible.

The following will give you a sense of coming academic year. Please read it carefully. This document should be read in tandem with IADT's response to Covid-19 protocol available [here](#). There is a lot in that document but the institute also has a FAQ section that answers a lot of the general questions [here](#) and is very useful.

This is a complex and dynamic situation and things will change. Take the following as a 1st step to your return to IADT. In a couple of weeks we will arrange talks with your lecturers who will go through this with you again, in more detail, and once you return we will have more complete timetables.

Timetable outline

It has been frustrating for many of you not to have received timetables for the year thus far. Typically, the timetable rolls over from year to year, however this year, because of the vast amount of changes that has not been possible. We are still working to finalise the timetables and they will be shared by the programme teams soon.

On Campus Provision 2020/2021

Based on our present information and guidance the following will apply

- Years 2/3/4 return 14th September. Year 1 students start 28th Sept (Dedicated full 1st week for Year 1)
- Because of social distancing, rooms will only take a set amount of people
- Each student year group will be divided into pods of set amounts that will not change for the first term. This is to assist with contact tracing should someone contract the virus. Pods will be between 10 and 20 students depending on the year group and programme.
- You will not have a dedicated desk space - we need to rotate everyone through all the spaces over the week – evening classes might be a possibility
- Larger studio spaces will be used to teach multiple pods at once if social distancing allows
- With adequate breaks, students can be in larger spaces for extended periods under supervision and where faces coverings are worn
- Students can expect to be on campus twice a week on average
- When on campus your time will be focused on learning safely and once you are finished classes we ask that you leave the campus
- You are welcome to use the Library whenever you are scheduled to be on campus
- The canteen will be available but in a limited capacity with limited seating

- Work spaces are available but not as open bookable spaces – they will be scheduled for supervised making time
- Where appropriate, classes will be moved to remote learning – on campus time will be focused on practical learning
- Periods of intensive practice-based learning are preferable on campus
- Where feasible, activities such as classes or student project work may take place outdoors
- Fieldwork should continue mindful of 2m physical social distancing
- All project work should be mindful of social distancing
- **When you are thinking of a project and what you are going to make or do – think of how you will manage it in a world with Covid-19**

Health & Safety – Key principles

- The key principle is that everyone shares responsibility for ensuring social distancing is being maintained and that everyone follows the health and safety guidelines
- Facial coverings are to be required in all spaces where a 2 metre distance cannot be maintained (e.g. all technical spaces, some classroom, all studio and lab spaces) except where there are legitimate reasons for not wearing a mask (see definition in the IADT return to work [protocols](#) and [HSE guidelines](#))
- Wherever possible we must minimise contact – come to campus, attend classes and leave when finished your timetabled activities
- Everyone must maintain correct respiratory coughing and sneezing [etiquette](#)
- Class attendance will be recorded to help with contact tracing – we also encourage the use of the HSE [app](#)
- Protective screens will be installed in smaller spaces where people need to be in close proximity or face visors will be worn with a face covering
- A special covid-19 cleaning regime will be in place however we must all clean our own spaces too before we begin and once we are finished in a space - equipment and surfaces in your immediate area should be fully cleaned when you are finished with them and before you first use them.
- Blue paper roll and appropriate sprays will be provided for each location/station

Induction for Students

- In the first two weeks of term (Sept 14 – 25th) induction will be provided to all Years 2,3, & 4 students on the new protocols and practices (details to follow)
- 1st years will have a dedicated full week beginning 28th of September (other years will not be on campus)

Technology resources

- Microsoft Teams or Blackboard are the preferred platform for remote teaching.
- Some lectures or parts of lectures will be recorded so you can look back at them – we are also investing in simple multi camera set ups that will allow teaching to be more dynamic.

Studio & Filed work Protocols

We are working on risk assessments and out of that protocols that will apply to working in studio spaces and out and about.
