General Parking Regulations on Campus

1. Introduction

The Institute has a limited number of parking spaces available on campus for use by staff, students and others (the "Users") as well as visitors to the Institute and/or to other occupiers of the campus during official opening hours (which may vary from time to time). The Institute wishes to promote the use of alternative means of transport (public transport, cycling and pedestrian) to facilitate the availability of parking spaces to those for whom alternative transport methods are not viable.

It is recognised that there are insufficient car parking spaces available to accommodate all users and visitors to the Institute and therefore this policy sets out the mechanism by which the available spaces can be allocated equitably.

These regulations are designed to facilitate the availability of parking to as many users as possible, to discourage unauthorised use of the car parks and to comply with the legal obligations of the Institute.

The availability of parking facilities is subject to demand at any particular time and should be regarded as a privilege and not a right. Cars are parked on campus at the owner's risk.

1.1. Repeal of all existing regulations

These regulations supersede and repeal all previous regulations governing car parking on campus. Any authorisations, agreements or rights are repealed and extinguished by these regulations. These Regulations are made in accordance with the requirements of the Vehicle Clamping Act 2015 and the Vehicle Clamping and Signage Regulations 2017.

1.2. Regulation development process

The original IADT regulations were developed through a consultative process involving the Institute, all representative trade unions and the Students Union. This consultative process was conducted in accordance with the methods developed through the Partnership Process. Amendments to the Regulations have been based on technical updates to the Campus, legislation and the contract with the Car Parking Management Company.
